

MEET THE PROS

Skin Expert Danuta Mieloch

Danuta Mieloch grew up in Poland, where the importance of skincare is practically inherited. Estheticians in Poland attend nursing school and are educated alongside dermatologists. In addition to her nursing training, Danuta traveled to Paris to study with the innovator Dr. Yvan Allouche, creator of the revolutionary Biologique Recherche product line, whose philosophy on skin care helped inspire her own. She moved to New York City in 1994, and Danuta received her accreditation from Atelier Esthetique and the Dermal Institute of New York. She opened her **Rescue Rittenhouse Spa** in 2004 in Philadelphia.
